

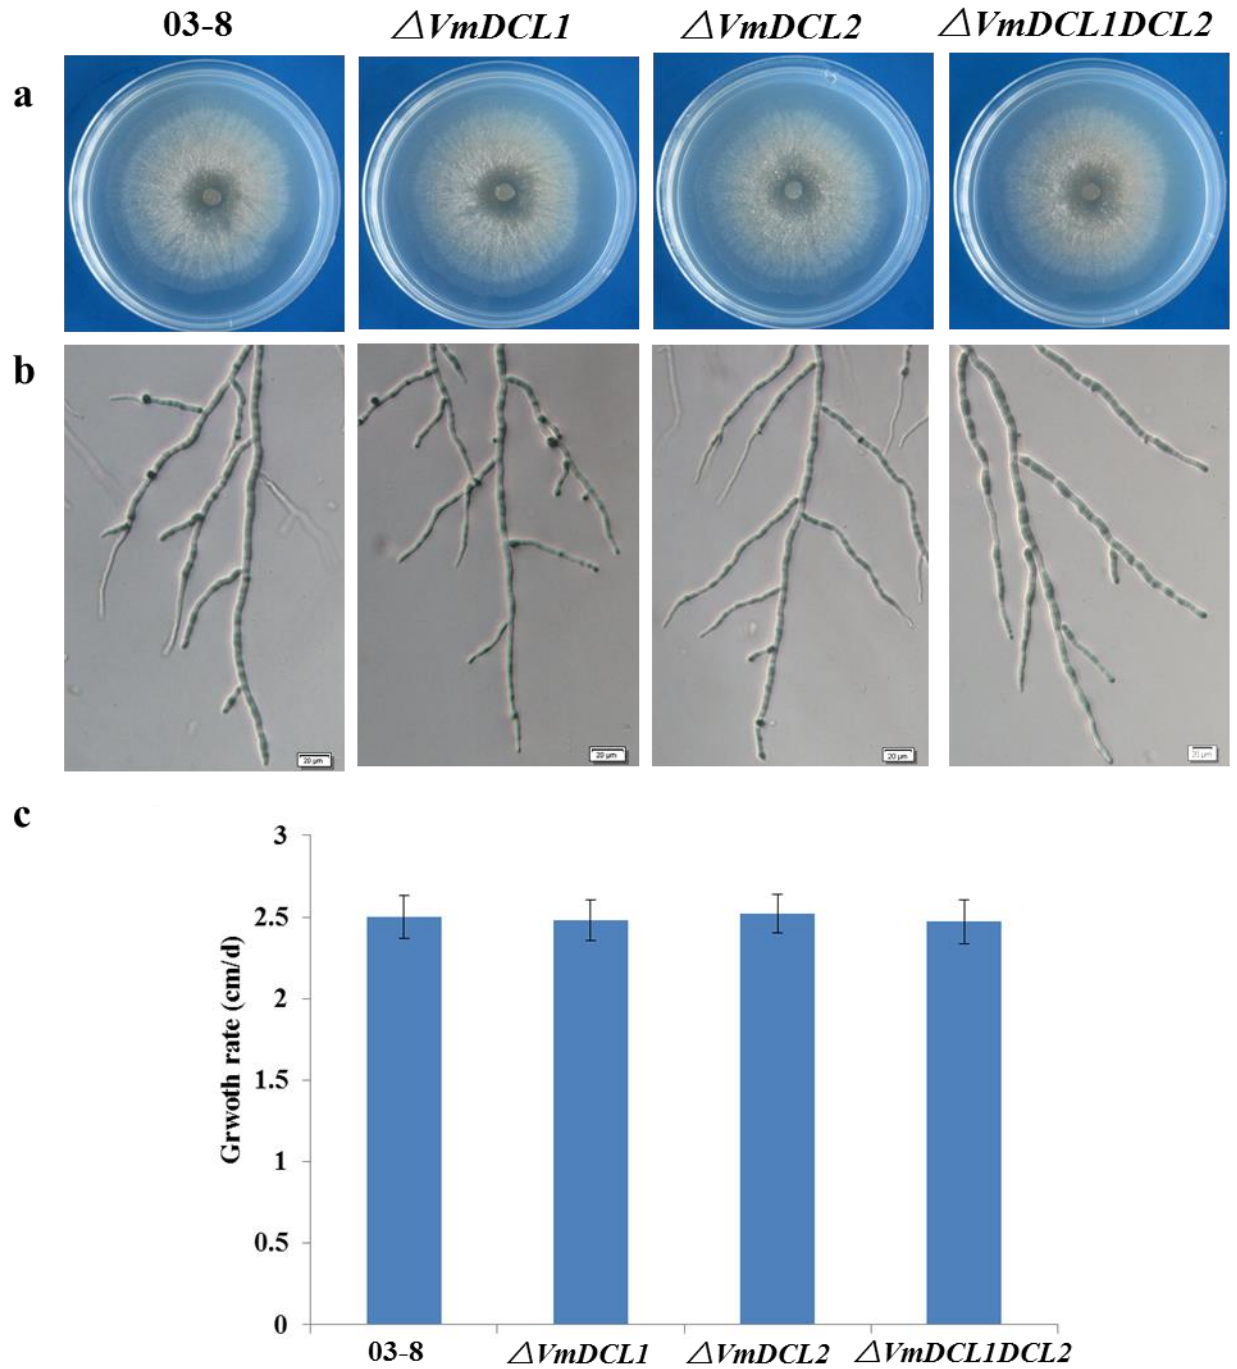

Fig. S3 Vegetable growth between *VmDCLs* mutants and 03-8

a. Colony morphology of *VmDCL1*, *VmDCL2* and *VmDCL12* gene knock-out mutants (PDA, 25°C, 2d). **b.** Hypha morphology of *VmDCL1*, *VmDCL2* and *VmDCL12* gene knock-out mutants (PDA, 25°C, 2d). **c.** Growth rate of *VmDCL1*, *VmDCL2* and *VmDCL12* gene knock-out mutants (PDA, 25°C). All experiments were performed in triplicate, with three petri dishes in each repetition.
